

ROI Training

Anthropic Models on Amazon Bedrock

Module 8:

Amazon Kiro and Enterprise
Code Generation

Lab 3

Course Contents

Module 1: Foundations: Generative AI and Claude Models on AWS

Module 2: Claude API Fundamentals and Prompt Engineering

Module 3: Data Preparation and Knowledge Bases for RAG

Module 4: Tool Use and Agentic Workflows with Claude

Module 5: Security, Governance, and Guardrails

Module 6: Practical Architecture and Deployment Patterns

Module 7: Claude Code: Building Bedrock Applications

► **Module 8: Amazon Kiro and Enterprise Code Generation**

Module Objectives

Describe Amazon Kiro

An enterprise platform for
AI-assisted software development

Differentiate Tools

Compare Claude Codevs. Kiro

Explain Claude's Role

How reasoning supports complex
software development

Identify Use Cases

Recognize scenarios where each tool is
most appropriate

Amazon Kiro

Enterprise
Agentic IDE

Full IDE built on VS Code foundation
Spec-driven development workflow
AI agents work from structured requirements
Designed for team and enterprise scale

What Is Amazon Kiro?

Agentic IDE

Full IDE from Amazon,
not just an editor
with AI autocomplete

Spec-Driven

Structured requirements
guide AI generation —
not vague prompts

VS Code Based

Built on VS Code
foundation — familiar
interface for developers

Claude Powered

Uses Claude models
for reasoning and
code generation

Kiro Core Concepts

Specs

Structured requirements

Steering

Control AI output quality

Agents

AI workers execute tasks

Hooks

Auto-trigger on changes

Claude Code vs. Amazon Kiro

Claude Code

Terminal, VS Code, Desktop

Conversational, ad-hoc

Quick tasks, exploration

Amazon Kiro

Full IDE on VS Code base

Spec-driven, structured

Team and enterprise scale

Complementary Workflows

1

Explore with Claude Code — prototype, debug, learn

2

Formalize with Kiro — specs, tests, production code

3

Both powered by Claude — same reasoning engine

4

Claude Code for personal projects and quick tasks

5

Kiro for team codebases where consistency matters

Claude: The Reasoning Engine Behind Both Tools

Extended Thinking

Reasons through complex architecture decisions before generating code

Multi-Step Reasoning

Debugging and root cause analysis across multiple files

Code Understanding

Reads large codebases, follows your patterns and conventions

Test and Spec Writing

Generates unit tests, edge cases, and clear specifications

Lab 3

Building an Anthropic-based AI Application

In this lab, you will:

- Implement custom tools for Claude
- Explore when to use Tools vs RAG vs Prompts
- Configure production content guardrails
- Deploy a serverless Claude application
- Debug tool execution issues

What We Covered

Describe Amazon Kiro

An enterprise platform for
AI-assisted software development

Differentiate Tools

Compare Claude Codevs. Kiro

Explain Claude's Role

How reasoning supports complex
software development

Identify Use Cases

Recognize scenarios where each tool is
most appropriate

Next Steps

ROI Training has partnered with Amazon Web Services to offer exclusive AI Workforce Transformation instructor-led training courses:

- Building Agentic AI Applications with Amazon Kiro
- Hands-On Kubernetes on AWS
- Hands-On Terraform on AWS
- Advanced Terraform on AWS
- AWS Analytics on Databricks
- AWS Observability with Splunk

Next Steps

Continue to expand the skills you need, your way, with more than 500 courses developed by the experts at AWS: **AWS Skill Builder**

GAME-BASED
LEARNING

SELF-PACED
LABS

USE CASE
CHALLENGES

EXAM
PREPARATION

AWS Certification

AWS Certification helps learners to build credibility and confidence by validating their cloud expertise with industry-recognized credentials.
